Opeyemi Benjamin

has successfully completed the online, non-credit Specialization

Google Network Security

Individuals who earn the Network Security Specialization from Google have completed a program where they practiced with industry-standard tools and applied their knowledge in real-world scenarios. They are competent in foundational skills in network architecture, operations, intrusion detection, system hardening, and incident response. They know how to investigate security breaches and intrusion tactics, apply OS, network, and cloud hardening techniques, and analyze network traffic and logs using Wireshark, Suricata, Wazuh, and Google SecOps.

Network Architecture

Network Operations

Secure Against Network Intrusions

Security Hardening

Introduction to Detection and Incident Response

Network Monitoring and Analysis

Network Traffic and Logs Using IDS and SIEM Tools

Amanda Brophy
Global Director of Google Career Certificates

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
