Benjamin Opeyemi Abraham

+234-9069244034 | oluwafemibenjamin488@gmail.com | Lagos, Nigeria.

PROFESSIONAL SUMMARY

Enthusiastic and dedicated undergraduate student of Computer Science at Lagos State University, seeking a SIWES/Industrial Training placement to apply and expand my practical skills. Possess strong foundational knowledge in computer networks, cybersecurity, and problem-solving, with hands-on experience in ethical hacking tools and network troubleshooting. Adaptable, quick learner, and eager to contribute positively as part of a motivated team.

WORK EXPERIENCE / PROJECTS

SIWES intern | Lagos State University of Education (LASUED) **March 2026 - Present**

- Supporting campus IT infrastructure through routine maintenance
- Developing digital solutions to automate the SIWES unit's administrative workflows.
- Monitoring enterprise system performance and resolving basic connectivity and hardware issues.
- Maintaining precise logs of system updates and administrative technical requirements.

Google Developer Group LASU 2.0 **April 2025 –July 2025**

- Assisted in network configuration and troubleshooting using Cisco Packet Tracer.
- Gained practical understanding of routing, switching, and network protocols.

DevTown Bootcamp **May 2025 – May 2025**

- Studied web application security and learned to identify common vulnerabilities.

Cybersecurity For Everyone **April 2025 - May 2025**

- Learnt basics of cybersecurity, including common threats, safe practices, and risk management.

EDUCATION

Bachelor of Science in Computer Science

Lagos State University **Nov 2023 – Present**

Senior Secondary Certificate Examination (SSCE)

Adeniyi Goodwill Secondary School **Sep 2017 – Jul 2022**

ACHIEVEMENT AND CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- Google Network Security
- Computer Networks Fundamentals - Udemy
- Introduction to Cybersecurity - Cisco Networking Academy
- Introduction to Cybersecurity Fundamentals - Coursera
- Cybersecurity Awareness and Innovation – Coursera

SKILLS

Technical Skills:

- Operating Systems: Linux (terminal, shell commands, file permissions), Windows
- Networking: TCP/IP, DNS, Ports, Firewalls, IP Addressing, Subnetting, Cisco Packet Tracer
- Security Tools: Nmap, Wireshark, Metasploit
- Cybersecurity: Ethical Hacking, Threat/Vulnerability Analysis

Transferable Skills:

- Analytical and problem-solving ability
- Self-motivated and fast learner
- Team player with leadership potential
- Strong communication skills

INTERESTS

- IT Support and Networking
- Cybersecurity fundamentals and threat hunting
- Software troubleshooting
- Continuous learning and professional growth in emerging technologies

---

KEY CYBERSECURITY PROJECTS

Professional SOC Portfolio Website

- Engineering: Developed and deployed a responsive, custom-styled cybersecurity portfolio using React, Tailwind CSS, and Vite.
- Integration: Implemented a dynamic certification gallery and professional branding elements for live skill showcasing.
- Deployment: Managed the full lifecycle of the application via GitHub Pages, demonstrating CI/CD and web hosting proficiency.

SOC Home Lab: Wazuh SIEM & Threat Detection

- Architecture: Deployed a full-scale SOC environment using a Wazuh Manager (Ubuntu) and integrated Windows 11 telemetry.
- Telemetry: Configured Microsoft Sysmon for process-level visibility to detect anomalous executions and lateral movement.
- Active Response: Engineered automated scripts to neutralize SMB brute-force attacks (MITRE T1110) via firewall blocks within 60 seconds.

SIWES Document Tracking System

- System Design: Architected a relational database to automate student logbook tracking and supervisor assignments.
- Process Automation: Transitioned the administrative unit from manual paper logs to a digitalized, real-time tracking workflow.
- Impact: Significantly reduced document processing time and improved data accessibility for the SIWES unit.

Networking & Infrastructure (Additional Skills)

- Core Concepts: Proficient in IP addressing, Subnetting, DHCP, and NAT configuration.
- Tools: Hands-on experience with Cisco Packet Tracer, VirtualBox, and Linux CLI (Ubuntu/Kali).
